Partner/Partner Designate, Electronics/Engineering, London, £Highly Competitive and Flexible Remuneration

A prestigious European firm is seeking a high calibre patent attorney to join its London based electronics and engineering practice in a Partner Designate capacity. The position enjoys a healthy balance of agency and direct client work across an array of exciting technologies, ranging from computer hardware to sub-sea drilling and beyond. As well as supporting prominent clients in the UK and internationally, the role will be highly commercial. You will need a strong technical background in electronics or engineering, and will likely be at Senior Associate or salaried Partner level, and will ideally be dual qualified. Swift progression through to Partnership is a significant part of the firm's development plan so you will need to be ready to take on the responsibilities associated with being a business leader.

Associate Qualified (or Finalist), Biotechnology, London, £70-80,000

Become a strategist, advisor and advocate for some of the top ten biotechnology companies around the world. You will be responsible for shaping and implementing your clients' IP programmes across Europe and will enjoy significant opposition and litigation cases, strategic prosecution, and high value due diligence work. The practice operates a working environment in which influence originates at all levels and where those who achieve will be very well rewarded. There is demonstrable career progression through to partnership and access to some of the best clients and attorneys around. Applicants should have a technical background in biochemistry/biotechnology and preferably be qualified in the UK and/or Europe; finalist level candidates will also be considered.

Chemistry, Part Qualified Patent Attorney, London, c. £40,000

This is an excellent opportunity to join the London office of a highly respected firm. Due its continuing successes, it is looking to strengthen its life sciences and chemistry group with the addition of a part qualified patent attorney. You will cover a broad spectrum of subject matter including pharmaceuticals, oil and petrochemical technologies, cosmetics, and nanotechnology. You will have access to a first class support network as you will join a team of industry leading specialists, including 'tier 1' attorneys as recommended by Legal 500. You will be working with an interesting range of clients both in the UK and overseas including large corporations, prestigious universities and innovative SME's. You will also be exposed to the whole gamut of patent work, from oppositions and litigation, to due diligence and prosecution. The role would suit candidates with at least one year's experience as a patent attorney in training.

Electronics/Engineering Patent Attorney, All Levels Considered, Midlands

This firm's renowned engineering operation covers the broad range of technical subject matter, from aeronautical to automotive, clean tech, medical devices, and materials. The electronics team has impressive commercial acumen and deals with the entire spectrum of work ranging from bioinformatics to nanotechnology and beyond. Their client portfolio is impressive and includes large corporations, start-ups, and SME's. The firm's Partners have extensive experience of prosecuting patent applications before numerous patent offices, as well as representing clients at EPO hearings. Candidates will need a strong background in electronics or engineering, and promising candidates at all levels will be considered.

Patent Attorney, Electronics/Physics, Scotland

Join a private practice with a well balanced mix of interesting local clients and dynamic international corporations. Build relationships with SMEs and universities and help develop and organise their IP strategies, including IP capture, drafting, filing and the prosecution of patent applications both within the UK and internationally. As well as working with an existing portfolio of work, you will also be given the opportunity to aid the acquisition of new clients. The firm has a world class support structure and you will benefit from a highly collaborative culture and backing from the firm's Partners and experienced paralegal team. The practice has grown rapidly over the recent years, providing unbound career potential. Ideal candidates will be European qualified with a technical background in physics, electronics or a related field. The role has flexibility in relation to seniority, so qualified candidates at any level may be considered.

Associate Finalist Level (or Newly Qualified), Elec. /Phys. /Eng., London, c. £60-65,000

Join a leading patent and trade mark firm's highly reputable engineering and electronics practice in its prominent London offices. The team provides the entire spectrum of services to its clients from filing to prosecution and oppositions, and works directly with an array of UK and international clients including multinational corporations and household names, world class universities and research institutions, SME's, and sole inventors. You will handle a broad range of innovative technologies including software related inventions and telecommunications, through to optical recording media, avionics and beyond. Candidates will need a strong academic background in high tech or a related subject area and will preferably be at finalist level. Those with 3 years' in the profession through to recently qualified candidates will also be considered.

Trainee Patent Attorney, Electronics/Engineering, London, c. £40,000

Gain invaluable experience in the drafting and prosecution of EU, UK and PCT patent applications; represent clients at the EPO; and manage important IP portfolios. The client mix ranges from individual inventors and academic institutions to multinational household names. You will have the opportunity to travel extensively across Europe, Asia and the US, to generate additional revenue for the firm through various business development activities. This position is able to offer you the security that is only afforded by a reputation built through years of impeccable service and can offer a less hierarchical structure than many firms, allowing you the freedom to shape your career path within an ever evolving profession. Ideal candidates will have an electronics or engineering background and around 1-2 years' experience.

Associate Newly Qualified, Chemistry, Midlands

A highly credible firm are looking to recruit an additional associate into their team. You will be working alongside an extremely reputable Partner and will have access to a growing portfolio of industry leading clients. There is a high proportion of UK and overseas direct client work available, and the firm encourage their attorneys to take a consultative and hands on approach. The technology mix will have a chemistry focus, including alloys, surfactants and catalysts, through to pharmaceuticals, cosmetics and agrochemical formulations. You will also have the opportunity to be at the forefront of the development of green and energy related technology. Flexible working is encouraged and is supported by the firm's paper-lite on line management system. Although ideal candidates will be recently qualified, finalists and those a few years' post qualified will also be considered.

Arabic Speaking Trade Mark Paralegal, Dubai

A leading global law firm is increasing its team with the hire of an additional trade mark paralegal. Responsibilities will cover the entire spectrum of trade mark prosecution, from conducting pre-filing clearance searches to preparing reports and undertaking brand audits. Regular contact with agents, clients, and third parties will also be required. Ideally, candidates will have at least three years' experience as a trade mark paralegal or administrator and will preferably have worked in western jurisdictions. Experience of using docketing databases such as IPPO is a must, and successful candidates will need to have an excellent command of English and Arabic.

Associate/Senior Associate Level Trade Mark Attorney, London, £65-75,000

A leading and established patent and trade mark firm are in need of a qualified trade mark attorney to join them in London. The role will offer the successful candidate a challenging variation of work with responsibilities including managing trade mark and registered design applications in jurisdictions such as the US, Europe, UK, Russia, Japan, Australia and Saudi Arabia; advising on the protection of brands in emerging and established markets; preparing license agreements, cease and desist letters and settlement agreements; liaising and negotiating with foreign associates in the US, Russia and Japan; and further developing the firm's portfolio through various forms of business development.
