## Featured Position

**Direct Clients, International Work, Clients Who Are Leading Global Brands, A High Profile Firm That Is Really Going Somewhere: Patent Attorney, Biotechnology, London.**

Not just a job as a Patent Attorney but a role with potential, autonomy, scope and diversity. The evolutionary step for your career. Build on your experience and realise your aspirations based on what you deserve, not on your management of politics.

- Join a firm that has proven itself to be highly successful throughout the recession
- Enjoy autonomy and a diverse range of work incorporating drafting, high value prosecution, oppositions and appeals
- Benefit from extensive direct client work in addition to an exciting international portfolio
- Be part of a high quality, high performing team
- Thrive within a meritocratic career structure with highly competitive remuneration
- Work with leading global brands

### Candidate brief:

You will have a technical background in biotechnology and experience as a Patent Attorney in either private practice or industry. You will require only minimal supervision and will enjoy being given the responsibility to work in your own style. You will likely be a UK and European qualified Patent Attorney (although nearly qualified candidates may also be considered). The remuneration offered is excellent and will be very attractive to candidates from newly qualified up to circa 4-5 years post qualified experience.

## Other Opportunities:

### Newly Qualified European Patent Attorney, Electronics, In-House

A rare opportunity to move into a role within a corporate environment and develop your intellectual property strategy skills. Gain exposure to cutting edge technology and the whole gamut of in-house attorney skills; oppositions, litigation, invention mining, etc. Candidates should have a background in electronics with ideally a telecommunications bias.

Remuneration is excellent including bonus, car allowance and a great basic salary.

### Qualified Patent Attorney, Mechanical Engineering, London

Work with one of the most innovative firms in the UK in a role that is both varied and challenging as well as having a discernably international flavour. You will enjoy providing consultative advice, will not be afraid of being busy and will have a track record of adaptability in relation to new and interesting complex problems. A social animal, you will take pleasure in making new connections worldwide.

### Partner, Patent Attorney, London

A leadership role for a Patent Attorney with a multitude of skills: technically strong, adept at networking and business development and with an aptitude for managing staff. With an exemplary scheme for progression beyond initial high ranking status, the position would suit existing Partners or those who feel they should be.

### Entry into the Patent Profession, London

A great route to becoming a Patent Attorney if you have experience with 4G mobile phone technology in either R&D for a corporation or via a PhD. If you are tempted by a career in intellectual property then take this chance. Full training provided to qualify as a Patent Attorney.

### Work in Scotland!

Fellows and Associates are recruiting for a range of positions and a number of firms in the Scottish market. We have qualified positions across Scotland in electronics, biotechnology and chemistry and part qualified positions in electronics. Relocation may be offered for candidates moving from other regions of the UK.

### Partner Designate, Manchester

Develop the Manchester operation for this enterprising firm of patent attorneys. You will be given the responsibility to build your own portfolio (with support of the firm with existing work) and over time develop your own team. The role would suit an Attorney seeking a change from the regular Manchester names and a job that is just that little bit different. You will be will empowered with a financial budget for development and a very healthy salary.

### Electronics, Qualified Patent Attorney, London

This fast expanding department for an eminent private practice requires an Attorney with a varied range of skills who can cope with oppositions and appeals as well as preparation and prosecution. With a high proportion of direct clients, many of which are world leading companies, the firm can offer a progressive environment where you can develop your career and your knowledge at a very fast pace.

### Chemistry, Qualified Patent Attorney, London

Work life balance, a high salary, a potent mix of work and a culture of inclusiveness; this firm would be ideal for an Attorney wishing to add some fun to their job. The role would likely most appeal to a candidate with 1-2 years post qualified experience but those with more will of course be highly regarded.

### Electronics, Qualified, Midlands

Leading Birmingham private practice requires an Electronics Patent Attorney. Enjoy a fabulous range and depth of work. Ideally you will be a UK qualified Attorney although EPAs from outside of the UK will be considered.

### Partner, Trade Mark Attorney, London

Lead a trade mark prosecution department and help it to develop further via good management, business development and a keen sense for commercial strategy. The opportunity offers a chance to grow your career in a high profile role which will be very well supported by the firm.
