## Featured Positions

### Electronics, Qualified, London

Super firm, fabulous clients. Cutting edge technology. Direct client instructions from the US (not agency/foreign associate), opportunity to inherit a significant work load. Career progression planning is excellent - you will have plenty to do but will also benefit from the latitude to develop your own work if you want to. The firm has scope to increase the partnership and hence this role would suit an aspirant Associate whose ambitions are not currently being realised.

### Electronics Patent Attorney, Qualified or Part Qualified, London

This firm has one of the biggest names in the business, and they deserve every inch of it. The firm has a fantastic work environment, and offers some truly amazing clients, too. Ideally you will have an electronics degree, and have experience in drafting and prosecution of electronics patents. Working here will supercharge your career; whether you are PQ or have some experience under your belt, there are opportunities for advancement.

## Other Opportunities:

### Engineering Patent Attorney, Midlands

Part or recently qualified Patent Attorney required for this premier private practice. Benefit from an ample supply of direct client work and build a relationship with a variety of prominent world businesses. With career scope to progress significantly in the future and a remuneration strategy that is highly competitive this firm has a great deal to offer. The position would suit someone with a background in mechanical engineering with perhaps some exposure to electronics.

### Biotechnology Patent Attorney, Qualified, London

Well-renowned and well-established, this firm is a select and highly desirable place to work. When you join this team of friendly attorneys, you will not be twiddling your thumbs, as work in the biotech department is abundant. With some intriguing clients to sharpen your teeth, the firm's high standards will undoubtedly bring out the best in you.

### Chemistry, Qualified or Part Qualified, London

This is a very unique sort of firm; unlike most of the private practices we work with. If you are seeking a position quite different from the norm this really might be for you. They do work with some big name clients of course and have an environment that can be exhilarating. They're open minded as to your profile – you might be part way through qualification or have qualified in the last few years.

### Electronics, Part/Newly Qualified, London

Surrounded by a peer group of highly effective attorneys with an unrivalled academic pedigree this firm demands high quality from its recruits. But, if you are successful then the rewards are plentiful – they have a fantastic reputation, are collegiate in organisation and deal with some of the most prestigious companies in the world. Technical proficiency is a must, time in the profession is much more flexible – they are pragmatic with respect to how long you have been an attorney so far.

### Engineering Patent Attorney Part/Fully Qualified, Yorkshire

Actually two positions for attorneys with a background in mechanical engineering. Yorkshire has an excellent standard of living (houses are cheap compared with London) and salaries generally are in line with what an attorney of a similar level would earn in London. Yorkshire is home to many of the leading names in the IP profession as well as a sizeable legal community. There also tend to be greater opportunities for partnership in the firms in the region than there are in many of the London firms. A relocation north could massively improve your career prospects and increase your wealth (flat cap not included).

### Trade Mark Partner, London

Unusually for a position at this level of earning, a client following is not required. The firm does need someone who has the gumption to build a practice and expand on the work that they will inherit but they are very realistic about how long this might take. They are building a Trade Mark practice to complement their existing business and therefore there is plenty of opportunity to piggy back on existing relationships. This firm have demonstrated significant success in recent years and have a structure that can accommodate a quality orientated Trade Mark Partner.

### Electronics Patent Attorney, Part Qualified, London

Join this excellent and egalitarian private practice and you'll see your career flourish! They've grown a lot in recent years, expanding into all disciplines of the Patent and Trade Mark realm, but their roots lie firmly in electronics. For a Part Qualified attorney, they offer a perfect combination of working and learning, a supportive environment, and real options for your professional development, not just now but in the future, too.

### Pharmaceutical/Chemical Patent Attorney, Finalist or Newly Qualified, London

This exciting private practice with a bustling and sociable atmosphere has a rare opening in the pharma/chem team. As a finalist or newly qualified attorney you will find a welcoming team with plenty of high-quality peers who will motivate and inspire you. Seize your chance to be at the heart of the action, with cutting-edge clients and challenging work galore.

### Electronics Patent Attorney, Qualified, Manchester

Builders of business, behold! This fantastic firm is looking for someone to add to the busdev spirit into their Manchester office. Manchester's motivated team of attorneys and support staff are always looking for ways to expand their reach in the North, but they're dealing with some pretty interesting (global) work, too. You will spearhead the electronics department in their business development activities, identifying opportunities for growth, and making a name for yourself while you're at it.

### Biotechnology, Qualified, North West

Very well established biotechnology practice requires their final member. You will be a qualified Patent Attorney who can handle work autonomously but beyond that the firm has allowed itself the freedom to select from a variety of potential profiles. The role will grow into one of significant status for the firm and would suit someone seeking a great deal of cutting edge work, with the added bonus of building on their reputation.
