

Bertrand had discovered that green was in fact **NOT** the new black.

Featured Positions

Electronics, Qualified Patent Attorney, Manchester

Enhance your career by joining a firm that can give you a huge range of possibilities for your future. Great clients; superb training; interesting (and diverse) work; and superb career progression. You will thrive in an organism that thinks and behaves commercially and offers something different to the intellectual property market. The position would suit a potential future Partner with the desire to develop their skill base and help drive their practice.

Part Qualified Electronics Patent Attorney, London, £38-40k + Bonus

Working within a highly regarded team and a lean and effective department, this role should allow early responsibility and autonomy whilst still providing plenty of support to get you through your next round of examinations. The role would suit a candidate who holds a Certificate in Intellectual Property (or equivalent) or has passed the foundation papers and has, we would anticipate, somewhere in the region of 2 – 4 years' experience.

Other Opportunities:

Electronics, Qualified Patent Attorney, London, to £70k + Bonus

Great training and support, interesting, diverse and international clients. A firm with a foundation of sound commercial sense coupled with a fun cooperative environment and a diverse, interesting work load. The Partners encourage teamwork whilst rewarding individual success. As an arguably more enlightened practice than some of their peers, the firm would suit someone not seeking an entirely orthodox environment whilst still appreciating the security of establishment.

Mechanical Patent Attorney, Newly/Recently Qualified, South West

With a highly diverse portfolio this interesting role would suit an attorney looking for variety and also the scope to develop their own client base. The firm can offer a truly impressive list of large international corporations to deal with (along with small business and inventors). They encourage a consultative approach and will endeavour to give you a very rounded experience with preparation, prosecution, oral proceedings and oppositions.

Newly Qualified Electronics Patent Attorney, London

The firm has an excellent reputation and clients that include many global corporations meaning that the work can be both varied and intellectually challenging. Career prospects are also terrific with a structure in place to reward success and encourage personal development. You will be a keen networker and will take advantage of the many opportunities offered to you by the firm to quickly develop and grow your client base.

Qualified Biotechnology Patent Attorney, Manchester

This superb firm is one of the biggest names in the business, and is now looking for a true biotech buff to join their thriving Manchester office. With a highly professional, dedicated and organised team you will learn a great deal and develop your skill base to enable future exciting possibilities. There is a varied mix of work including plenty of oppositions.

Electronics, Newly Qualified, London

With significant new hires over the last year due to a substantial increase in work, an exhilarating role exists for a newly qualified attorney to join this leading private practice. Given the international flavour to their work you will also have the opportunity to build a global network of contacts. The firm has a great deal of telecommunications work in particular and has been at the forefront of some of the more interesting work within the sector.

Electronics Patent Attorney, Finalist, London, £55-60k

Expanding electronics department of an eminent London firm requires a new attorney to aid its team. Workload will be a mix of agency and direct client but you will also be encouraged to develop your commercial skills so that you will be equipped to supplement your work with your own portfolio given time. They will support you to become a fully rounded attorney with genuine partnership potential by exposing you to business development, consultancy and a control over your choice of clients.

Part Qualified, Electronics, London, £35-40k

Based within a team of extremely knowledgeable and capable Attorneys the role could give you a great chance of qualifying quickly. An extremely exciting role for the right candidate – the chance to develop ones abilities quickly, build a profile for oneself and work with cutting edge technology and leading international companies. The firm has an excellent brand and a clear new business acquisition strategy.

Mechanical Patent Attorney, London

Since their workload just keeps on coming, you will have to hit the ground running when you start at this well-respected private practice in central London. They won't take just anyone in – their reputation for excellence is carefully guarded so you'll have to know your stuff. But if you make it, you won't be disappointed – these guys have a highly diverse and enviable client base, so get cracking with that application!

Chemistry Patent Attorney, Qualified, London

You will benefit from a considerable portfolio of existing work whilst being given the freedom to build your own. The firm is highly recognised, has a good strategy for gaining new work and is very well run. They are one of very few firms recruiting in chemistry at the moment and given that their need is due to growth (not replacing a leaver) the future certainly looks promising.

Move to Yorkshire!

We have a number of vacancies across the Yorkshire region (particularly Sheffield and Leeds) for patent attorneys of any technical discipline. Excellent levels of remuneration (including some really attractive bonus schemes), excellent career progression, plentiful direct client work, exposure to contentious work and a career path that could be a little more exciting than many a London firm.
